

UNDERWATER PHOTOGRAPHY WITH MODELS

Recreates
a new world
from our already
known reality,
but the conditions are
different
- cosmic weightlessness
and boundless beauty.

It could
advertise
your brand
in a unique,
memorable and
non-standard way,
different from anything
your competitors
have done so far.

Plamena Mileva
underwater photographer

**I was born in the Black Sea city
of Varna, Bulgaria.**

**In 2001 I graduated with a master's degree from
the Faculty of Fine Arts at the University of Veliko
Tarnovo "St.St. Cyril and Methodius".**

I am dedicated to underwater photography with models.

**I have 11 years of experience as an underwater
photographer, numerous publications in Bulgarian
and foreign editions, more than 50 world prizes
in competitions and several joint and solo exhibitions.**

**I have been a member of the jury in underwater
photography competitions in Italy, France and Bulgaria.**

2. A FEW YEARS LATER, I WON 1ST PLACE IN HIERES (FRANCE) FOR A CREATIVE COMPOSITION IN WHICH I HAD USED 3 OF THE PHOTOGRAPHS ALREADY TAKEN IN ISRAEL.

1. THE IDEA FOR THIS COMPOSITION CAME FROM MY DESIRE TO PARTICIPATE IN THE WORLD UNDERWATER PHOTOGRAPHY CHAMPIONSHIP IN EILAT, ISRAEL IN 2014. I THOUGHT THAT I SHOULD IMPRESS THE JURY WITH SOMETHING THAT HAD NOT BEEN DONE UNDERWATER BEFORE. THIS CRYSTALLIZED THE IDEA OF JELLYFISH BIOLUMINESCENCE AT NIGHT. I DECIDED TO MIMIC THE EFFECT WITH ICE STRIPS, WHICH WERE BUILT INTO THE DESIGN AND PLUGGED INTO 2 ACCUMULATORS DIRECTLY ON THE MODEL'S BACK. MY "COSMIC JELLYFISH", ALONG WITH THE OTHER COMPOSITIONS I SHOT, LANDED ME 3RD PLACE IN THE MODEL CATEGORY. THE PHOTO RECEIVED THE SPECIAL AWARD FROM THE MAYOR OF EILAT AND BECAME THE COVER OF THE COMPETITION'S LUXURY CATALOG AS WELL.

THE DEEPEST UNDERWATER PHOTOSHOOT WITH MODEL IN THE WORLD

2015, TENERIFE ISLAND

32,70 m

THE BRIDE KNELT IN FRONT OF THE STATUE OF THE VIRGEN DEL CARMEN (THE MADONNA WITH THE BABY), SUNKEN OFF THE COAST OF LOS CRISTIANOS, TENERIFE, CANARY ISLANDS. THE PHOTOSHOOT HAD TO END FOR 14 MINUTES ONLY,

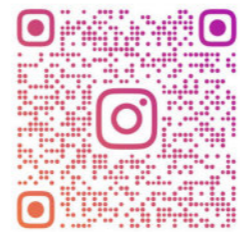

BEFORE THE MODEL GOES INTO AN UNWANTED DECOMPRESSION, WHICH REQUIRED SERIOUS PREPARATION OF THE ENTIRE TEAM.

THIS IS AN UNDERWATER PHOTO WHICH IS MOST LIKELY TAKEN AT THE DEEPEST DEPTH IN THE WORLD SO FAR: 32.70 M.

UWP PRESENTA Plamena Mileva
Photographers dal 2011 offre una vetrina sul web
gruppo facebook dove scambiare idee, tecniche,
Varna, la principale località balneare sul mar
aria. Col tempo crebbe sopra ogni altra cosa il
trasmettere le mie emozioni attraverso la foto-
grafia ha un significato speciale per me. È un'ar-
mette di creare figure e di raccontare storie,
tore con la tela. Nel 2001 mi sono laureata nel
di Arte della Veliko Tarnovo University "St. Cy-
dius". La fotografia è diventata allora il mezzo
lorare tutte le dimensioni della bellezza.
a utilizzare modelli sottacqua per disingere
rati alla vita e al mondo della Natura, lo credo a
la creazione più complessa, e trovo una sfida
care e mostrare la sua perfezione attraverso la
luce crea ombre nell'acqua allo stesso modo

UWP PHOTOGRAPHERS
grozze maestose e su relitti, cir-
condate da trigoni, tartarughe e
altre creature magnifiche. La sfida
più grande si rivelò far posare la
modella in un abito da sposa, ingi-
nocchiata in preghiera davanti alla
statua della Virgen del Carmen, a
33 m di profondità.
Il 2016 è iniziato con una serie di
concorsi, offerte promettenti e
progetti ambiziosi. Sono tornata
alla mia amata Bulgaria, continuo il
mio lavoro, cercando di trasmet-
tere la passione verso la fotogra-
fia subacquea e la bellezza del
mondo sommerso.

UWP PHOTOGRAPHERS
Il mio scatto "cosmic jellyfish" si rivelò come uno dei più co-
plessi allestimenti scenici che io abbia mai realizzato. L'usc
una luce gelida (gialla, blu e rossa) richiese l'attenzione co-
pieta verso i minimi dettagli. Questo è solo un esempio
come con la determinazione e il lavoro duro ogni risultato
possibile, purché si abbia una visione chiara di cosa si vo-
ottenere.
Il 2015 rimarrà un anno speciale, emblematico per me.
aprile partii per Tenerife dove dopo due mesi incontrai

PUBLICATIONS
I was born on the coast of the Black Sea in Bulgaria's largest seacoast - Varna. My youth was idyllic, and I was surrounded by the unique atmosphere that comes with coastal life - the soft, therapeutic sound of water lapping along the seashore, the brilliant rays of the sun as they beat down on the sand, to name but a few. Within this kaleidoscope of rich color and life, there developed within me the yearnings of an artist. Over time, as I grew older, I came to desire, more than almost anything else, to convey my emotions and yearnings through photography.

Fantaisie ésotérique
Plamena Emilova Mileva
"Fantaisie ésotérique" est le troisième de Plamena Mileva. Ses images étonnantes nous transportent dans un monde sous-marin où elle nous révèle une beauté et une diversité que nous ne voyons pas tous les jours. Elle nous invite à explorer les profondeurs du monde sous-marin et à découvrir les merveilles de la nature.

SEA TURTLE
Of the seven extant sea turtle species, three (green, Kemp's ridley and hawksbill) are listed as Endangered or Critically Endangered, three (loggerhead, olive ridley and leatherback) are listed as Vulnerable, and the last one, the flatback turtle, is considered Vulnerable in its native Australia. Sea turtles, which belong to the superfamily Chelonioida, face a large number of threats, nearly all of which are anthropogenic in origin. Degradation of nesting beach habitats and marine habitats, pollution, entanglement in nets, bycatch in commercial fisheries, and human consumption of eggs, meat and other products impact all sea turtles to varying degrees. Global warming also has the potential to impact the marine ecosystems on which turtles rely, while the sex ratio of embryos could also be impacted given the connection to incubation temperatures of turtle eggs.
